Mining claims across Ontario's woodland caribou ranges

Active mining claims as of 13 November 2026 cover 10.6% of caribou range area

Active mining claims

Woodland caribou range

Ring of Fire area (50 km around McFaulds Lake)

Key figures (claims as of 13 November 2026)

- 50,900 km² of caribou range is under active claim (10.6%)
- Most heavily claimed range: Sydney (31%)
- Largest claimed area: Missisa, 13,900 km² (20%), which contains the Ring of Fire
- Share of newly staked land falling in caribou range was about 40 to 46% in most years, 53% in 2021, 60% in 2025, and 50% in 2026 to date

Notes: A mining claim is not a mine, and overlap is not impact. Overlapping claims were dissolved before measuring area, calculated in Canada Albers Equal Area. The Ring of Fire area is illustrative (50 km around McFaulds Lake), not an official boundary.

Data: Mining claims from Ontario Ministry of Energy and Mines, OGSEarth (MLAS operational data, unofficial version, King's Printer for Ontario). Caribou ranges from Ontario Ministry of the Environment, Conservation and Parks, Caribou Range Boundary (Open Government Licence – Ontario).
